EXPERIENCE

Founder & CEO

May 2026 – Present

Blue Fork | [App Link](#)

Delhi

- Building **Fork**, an **AI-native platform for independent talent**, designed for creators, artists, musicians, actors, and professionals who monetize their audience, identity, or craft.
- Developing **AI agents and business tools** for discovering opportunities, pricing work, reviewing contracts, invoicing, payments, content workflows, and everyday commercial decisions.
- Creating a unified marketplace where **talent and businesses can discover, collaborate, and transact**, replacing fragmented workflows spread across DMs, spreadsheets, contracts, and payment tools.

Founding Member – Product & Engineering

Sep 2024 – Present

Reve | [App Link](#)

Gurugram, HR

- Helped build **Reve from zero to launch** as part of the founding team, evolving the product through multiple pivots into a consumer app with **25K+ downloads** across iOS and Android.
- Worked across **product, engineering, and design**, shaping core user experiences and shipping major parts of the application from early prototypes to production.
- Contributed to onboarding, engagement loops, and product iterations that supported **organic growth and retention** as the platform evolved.

Software Development Engineer

Sep 2023 – Aug 2024

MythyaVerse | [App Link](#)

Noida, UP

- Built multiple production applications using **Flutter**, including Oncarea and Oncarea Doctor, enabling video consultations and diagnostic workflows delivered end-to-end in under two months.
- Developed **VRPlaced**, a **Next.js** platform for 1-on-1 interviews with **OpenAI-powered** resume customization and real-time interview experiences.
- Worked across the complete product lifecycle including development, testing, deployment, integrations, and iterative product improvements across internal and client-facing products.

Mobile Application Developer

Dec 2022 – Jul 2023

Suraasa | [App Link](#)

Gurugram, HR

- Built and shipped Suraasa's flagship EdTech application from the ground up using **Flutter**, replacing legacy native applications and reaching **50K+ downloads** across Android and iOS.
- Built core product systems including authentication, profile management, app settings, notifications, and modular application architecture.
- Integrated a **custom video player**, third-party APIs, and platform features supporting learning workflows and user engagement.

AR/VR Developer

Dec 2021 – May 2022

Indian Institute of Technology, Delhi

New Delhi

- Developed immersive VR games and interactive experiences across experimental and research-focused projects.
- Worked on systems interpreting brain activity for device interaction using **EEG signals and neural spikes**.
- Conducted sessions and demonstrations introducing peers to VR technologies and their practical applications.
